Session : 20-21

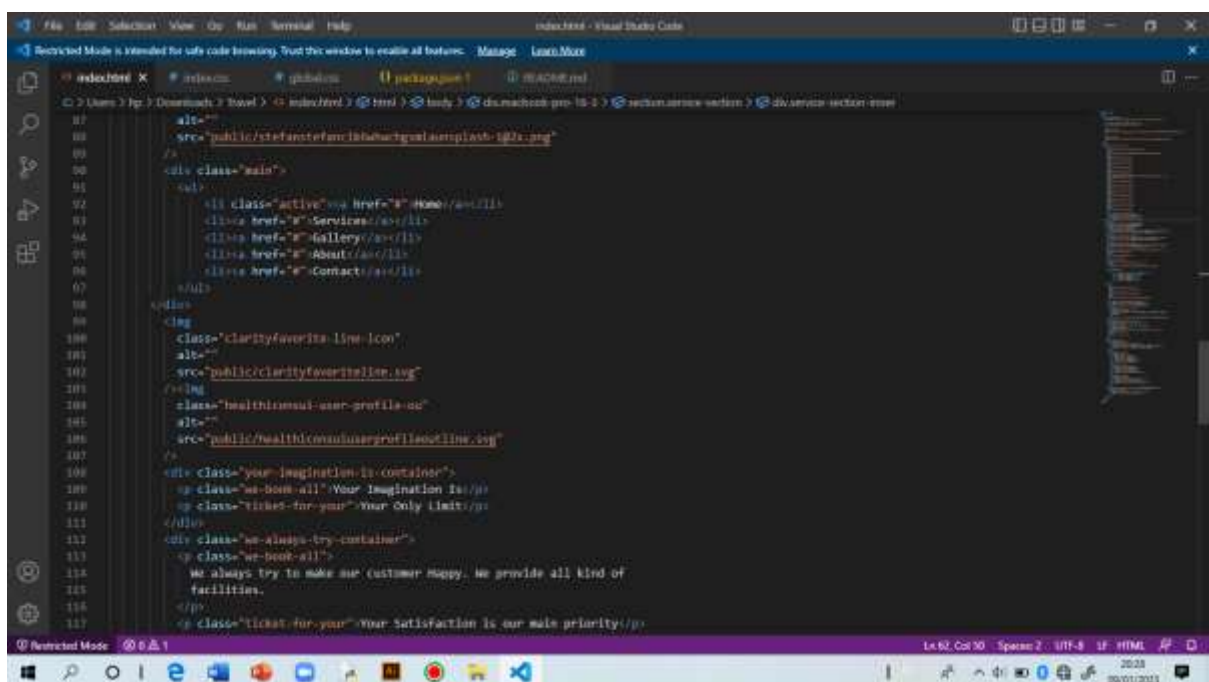

Project Agency name- Travel

Welcome to my presentation

Travel Agency

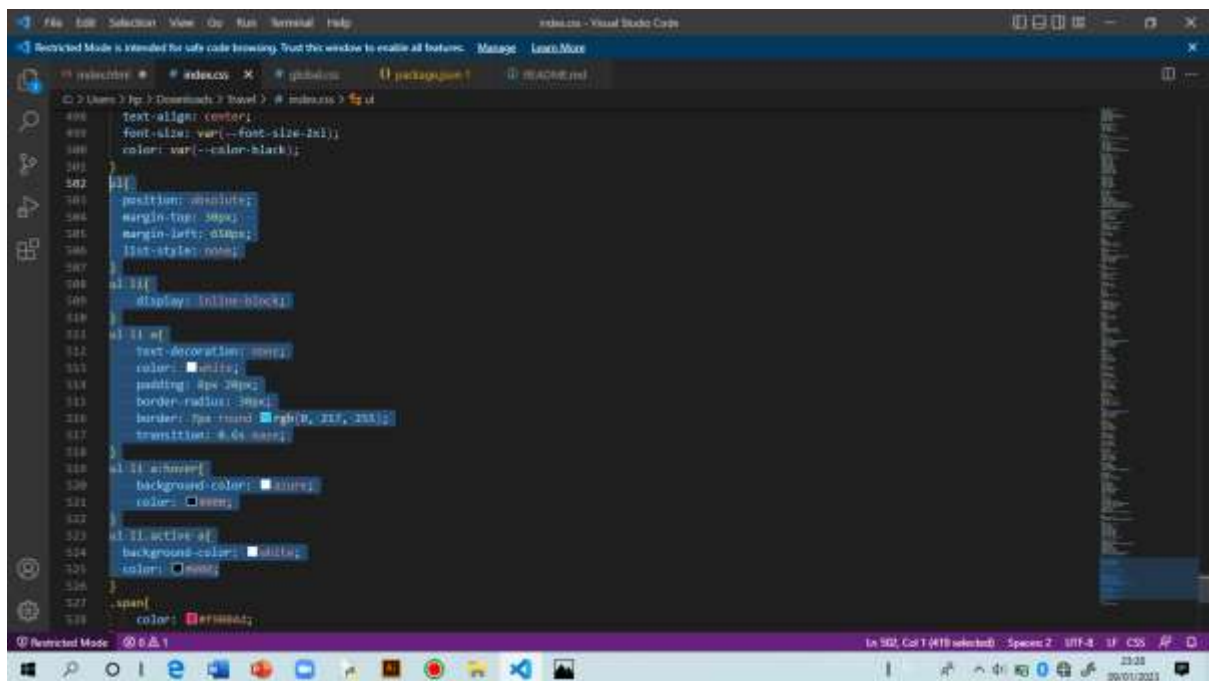

The main button that I am keeping in my web site is “Home, Service, Gallery, About, Contact” I want to different things for all pages and in future I will add all page completely in my web site...

program input...

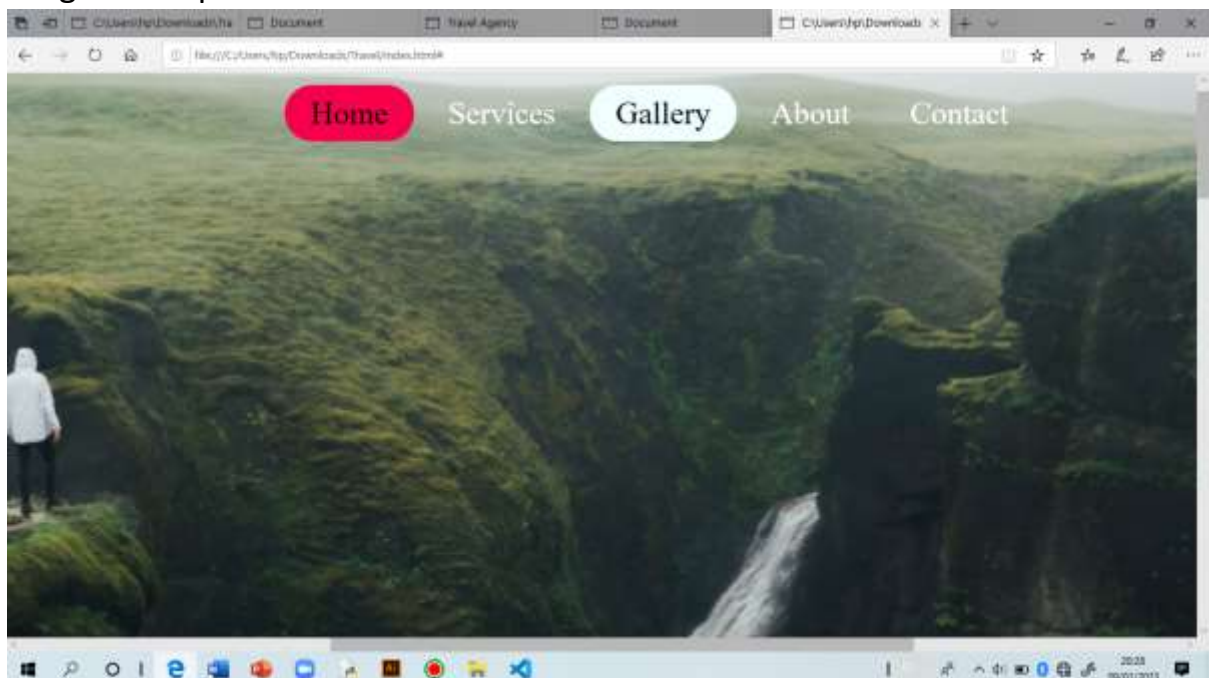

```
17  alt=""
18  src="public/stefanoferrariabackgroundsplash-tq3a.png"
19  />
20  <div class="main">
21  <div>
22  <li class="active"><a href="#">Home</a></li>
23  <li><a href="#">Service</a></li>
24  <li><a href="#">Gallery</a></li>
25  <li><a href="#">About</a></li>
26  <li><a href="#">Contact</a></li>
27  </div>
28  </div>
29  <div>
30  
35  
40  <div class="your-imagination-is-container">
41  <p class="we-boost-all">Your Imagination Is</p>
42  <p class="times-for-you">Your Only limit</p>
43  </div>
44  <div class="we-always-try-container">
45  <p class="we-boost-all">
46  we always try to make our customer happy. we provide all kind of
47  facilities.
48  </p>
49  <p class="ticket-for-you">Your Satisfaction is our main priority</p>
50  </div>
```

148     font-size: var(--font-size-sm);
149     text-align: left;
150 }
151 .we-provide-you-container,
152 .you-can-easily-container {
153     left: 702px;
154 }
155 .we-provide-you-container {
156     left: 1212px;
157 }
158 .carbonhotel-icon,
159 .clipper-plane-icon {
160     position: absolute;
161     top: 140px;
162     left: 704px;
163     width: 45px;
```

Output.....

I added another button (Dicover) to insert something new in this button I added some special feature in future.....

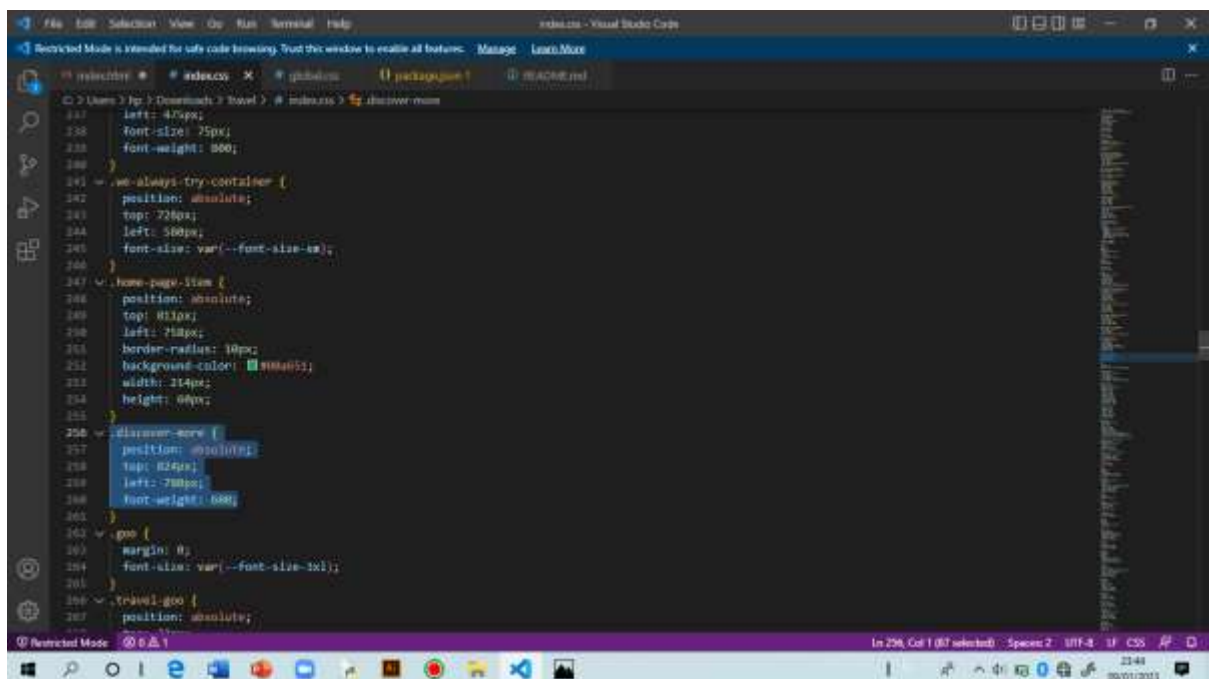

Program input (html)

The screenshot shows the Visual Studio Code editor with a file named index.html open. The code is HTML markup for a web page. The main content area contains several paragraphs and a list of links. The footer contains a company description and a list of links. The code is as follows:

```
121 </div>
122 <div class="we-always-try-container">
123   <p class="we-book-all">
124     We always try to make our customer happy. We provide all kind of
125     facilities.
126   </p>
127   <p class="ticket-for-you">Your Satisfaction is our main priority.</p>
128 </div>
129 <div class="home-page-item"></div>
130 <div class="discover-more">Discover more.</div>
131 <div class="travel-go">
132   <p class="we-book-all"><a href="#">Open.Tr</a></p>
133   <p class="go">Go</p>
134   
135   <div class="vector-icon">
136     
137   </div>
138 </div>
139 </main>
140 <div class="footer">
141   <div class="company-desc">
142     <div class="book-your-trip-container">
143       <p class="we-book-all">Book your trip in minute, get full.</p>
144       <p class="we-book-all">Control for much longer.</p>

154 }
```

Program output

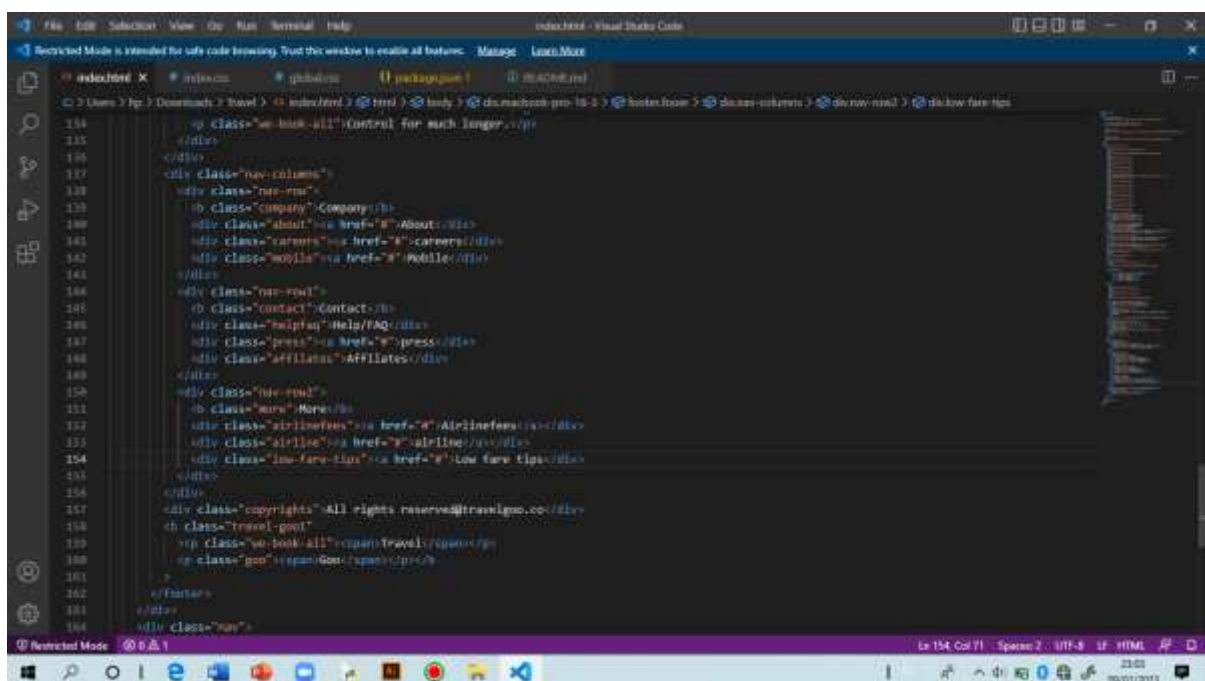

The section I used at the bottom of the website each have a different function
The button are “About, cares, Mobile, Help/FAQ , Contact, Press, Afflict, Air
line, Low fare tips”

In “about” function I have use some introduction function about my self and
my travel agency and the second function name is mobile in this function I
have use about all of my contuct information like mail, facebook, wahatesapp,
and contuct information

The 3rd Colum is made up of how much money will be required for air travel,
which flight schedule, what time, how much each tip will cost etc.

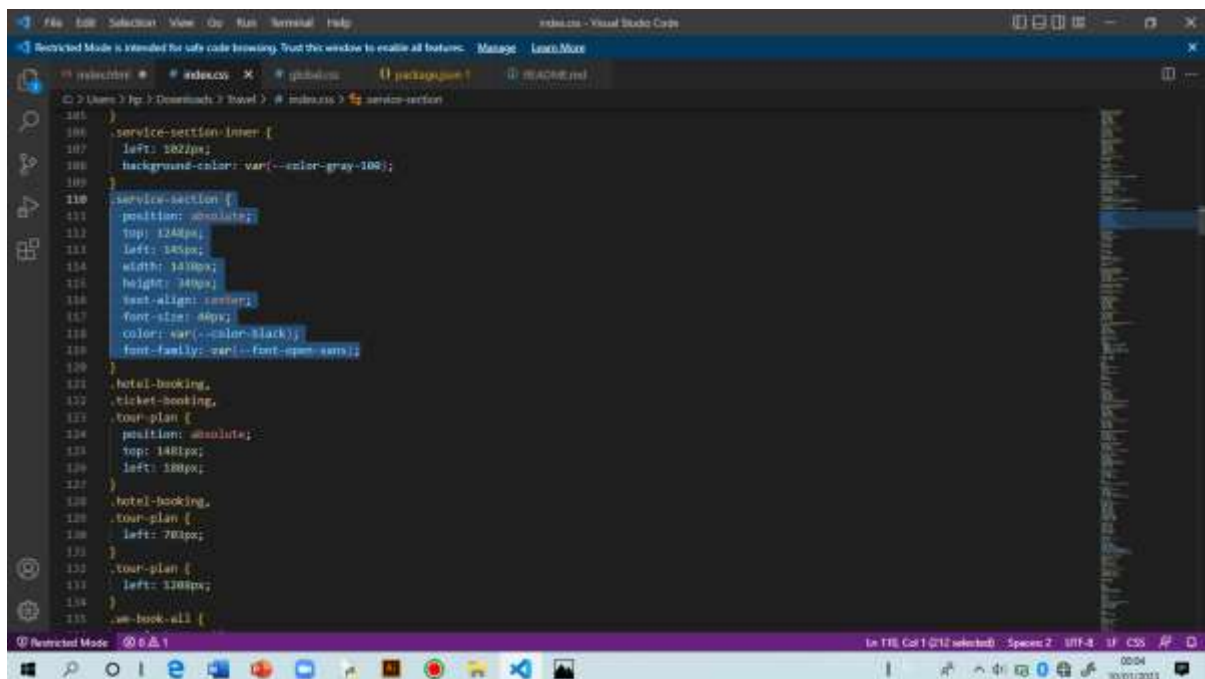

In future I have add all of my item.....
